INDEPENDENT AUDITORS' REPORT

To the Shareholders of Pacific Imperial Mines Inc.

We have audited the accompanying financial statements of Pacific Imperial Mines Inc. which comprise the statements of financial position as at June 30, 2016 and 2015, and the statements of comprehensive loss, changes in equity and cash flows for the years then ended, and the related notes comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of Pacific Imperial Mines Inc. as at June 30, 2016 and 2015, and its financial performance and cash flows for the years then ended in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board.

Emphasis of Matter

Without qualifying our opinion, we draw attention to Note 1 in the financial statements which indicates the existence of a material uncertainty that may cast significant doubt on the ability of Pacific Imperial Mines Inc. to continue as a going concern.

1. Nature of Business and Going Concern

Pacific Imperial Mines Inc. ("the Company") was incorporated under the British Columbia Business Corporations Act since September 18, 1987. The Company's shares are listed on the TSX Venture Exchange. The Company's principal office is located at Suite 1700, 700 West Pender Street, Vancouver, B.C. Canada V6C 1G8. The principal business of the Company is the identification, evaluation and acquisition of mineral properties, as well as exploration of mineral properties once acquired.

These financial statements of the Company have been prepared on a going-concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business.

The Company has experienced losses since its inception amounting to \$5,768,016 as of June 30, 2016 (2015 - \$5,675,158). The ability of the Company to meet its commitments as they become payable is dependent on the ability of the Company to acquire assets or a business or an interest therein, obtain the necessary financing, and develop assets or operations which will generate cash flows, either as a result of their disposal or from ongoing operations. The Company does not currently have assets or a business capable of generating ongoing cash flows. Although the Company has sufficient cash to meet its current administrative costs, there is no assurance that the Company will be successful in making an acquisition or in raising the necessary financing to do so. These conditions along with other matters indicate the existence of material uncertainties that may cast significant doubt about the Company's ability to continue as a going concern. While the financial statements have been prepared on the basis of accounting principles applicable to a going concern, adverse conditions may cast significant doubt upon the validity of this assumption.

In the event the Company is unable to arrange appropriate financing, the carrying value of the Company's assets could be subject to material adjustment. Furthermore, certain market conditions may cast significant doubt upon the validity of the going concern assumption.

These financial statements do not give effect to adjustments, if any, that would be necessary should the Company be unable to continue as a going concern and, therefore, be required to realize its assets and liquidate its liabilities in other than the normal course of business and at amounts which may differ from those shown in the financial statements.

2. Summary of Significant Accounting Policies

(a) Basis of presentation and statement of compliance with International Financial Reporting Standards

These financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

The financial statements have been prepared on the historical cost basis, except for certain financial instruments which are recorded at fair value as described in Note 2(I). In addition, these financial statements have been prepared using the accrual method of accounting except for cash flow information.

PACIFIC IMPERIAL MINES INC. Notes to Financial Statements For the Years Ended June 30, 2016 and 2015

(Expressed in Canadian Dollars)

2. Summary of Significant Accounting Policies (continued)

(b) Use of estimates and judgments

Estimates

The preparation of these financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the amounts reported in the financial statements and the related notes to the financial statements during the reporting period.

Significant areas requiring the use of management estimates include the decommissioning liabilities on mineral interests, recoverability and measurement of deferred tax assets and liabilities and the assumptions used in valuing options and warrants in share-based payment calculations. By their nature, these estimates are subject to measurement uncertainty and actual results could differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected.

Critical judgements

Critical accounting judgements are accounting policies that have been identified as being complex or involving subjective judgements or assessments with a significant risk of material adjustment in the next year. Critical accounting judgements is going concern.

(c) Cash equivalents

Cash equivalents consist of highly liquid investments which are readily convertible into known amounts of cash that have original maturities of three months or less when purchased.

(d) Equipment

Equipment is recorded at cost and amortized at the following rates per annum using the declining balance method:

Computer equipment and software - 30%

Additions during the period are amortized at one-half the normal rate in the period of acquisition.

2. Summary of Significant Accounting Policies (continued)

(e) Impairment

Non-financial assets with finite lives are tested for impairment at the end of each reporting period. In addition, long-lived assets that are not amortized are subject to an annual impairment assessment. Any impairment loss is recognized in earnings or the results of discontinued operations, as appropriate, for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less cost to sell or its value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows ("cash-generating units" or "CGUs"). The Company evaluates impairment losses other than goodwill impairment, for potential reversals, when events or changes in circumstances warrant such consideration.

(f) Mineral interests

The Company follows the method of accounting for its mineral interests whereby costs for acquisition of mineral interest or rights to explore and costs related to exploration and evaluation of a property are expensed as they are incurred until such time as the technical feasibility and commercial viability of the project is demonstrable. Development costs incurred are capitalized after the technical feasibility and commercial viability of a project is demonstrated and a development decision has been made. The capitalized costs of the related property are depreciated using the units of production method on commencement of commercial production. If it is determined that capitalized costs are not recoverable, or management has determined an impairment in value, the property is written down to its recoverable amount. Mineral properties capitalized are reviewed for impairment when facts and circumstances suggest that the carrying amount may exceed its recoverable amount.

(g) Decommissioning liabilities

The Company is subject to various government laws and regulations relating to environmental disturbances caused by exploration and evaluation activities and may from time to time incur decommissioning liabilities and the associated retirement costs related to site reclamation and abandonment. The fair value of the liability for an asset retirement obligation is recorded when it is incurred and the corresponding expense is recorded to net loss in the period that it is recognized. The liability is increased over time to reflect an accretion element considered in the initial measurement at fair value. As at June 30, 2016, the Company had accrued \$1,400 (2015 - \$2,000) in decommissioning liabilities related to the exploration and development of its mineral interests.

(h) Provisions

Provisions are recorded when a present legal or constructive obligation exists as a result of past events where it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount can be made. If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. The increase in the provision due to the passage of time is recognized as interest expense.

2. Summary of Significant Accounting Policies (continued)

(i) Income taxes

Income tax expense comprises current and deferred income tax. Tax is recognized in the income statement except to the extent that it relates to items recognized directly into equity, in which case the related tax effect is recognized in equity.

Current tax expense is based on the results for the period as adjusted for items that are not taxable or not deductible. Current tax expense is calculated using tax rates and laws that were enacted or substantively enacted at the end of the reporting period.

Deferred tax is accounted for using a temporary difference approach and is the tax expected to be payable or recoverable on temporary differences between the carrying amounts of assets and liabilities in the statement of financial position and the corresponding tax bases used in the computation of taxable income. Deferred tax is calculated based on the expected manner in which temporary differences related to the carrying amounts of assets and liabilities, using tax rates that are expected to apply to the year of realization or settlement using tax rates and laws enacted or substantively enacted at the end of the reporting period.

Deferred tax assets and liabilities are not recognized in respect of temporary differences that arise on initial recognition of assets and liabilities acquired other than in a business combination and which do not affect accounting or taxable profit or loss at the time of the transaction. The carrying amount of deferred income tax assets is reviewed at the end of each reporting period and recognized only to the extent that it is probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized.

(j) Basic and diluted loss per share

Loss per share is computed by dividing net loss available to common shareholders by the weighted average number of common shares outstanding during the period. The Company applies the treasury stock method in calculating diluted earnings (loss) per share. Diluted loss per share excludes all dilutive potential common shares if their effect is anti-dilutive.

(k) Share-based payment

The Company has a share-based payment plan as disclosed in Note 7, whereby stock options are granted in accordance with the policies of regulatory authorities. The Company uses a fair value based method of accounting for stock options to directors and employees. Stock options granted to non-employees are valued based on the fair value of the goods or services received or when fair value cannot be estimated reliably, the Company computes a fair value using the Black-Scholes option pricing model with assumptions for risk-free interest rate, volatility, expected forfeiture and life of the options or warrants. For directors and employees, the fair value of the options is measured at the date of grant. For non-employees, the fair value of the options is measured on the earlier of the date at which the counterparty performance is complete or the date the performance commitment is reached or the date at which the equity instruments are granted if they are fully vested and non-forfeitable. Stock options with graded vesting schedules are accounted for as separate grants with different vesting periods and fair values. The cost is recognized over the applicable vesting period as an increase in share-based payment expense, with the offset credit to contributed surplus. Upon exercise of share purchase options, the consideration paid by the option holder, together with the amount previously recognized in contributed surplus, is recorded as an increase to share capital.

2. Summary of Significant Accounting Policies (continued)

(I) Financial instruments

Financial assets

All financial assets are initially recorded at fair value and designated upon inception into one of the following four categories: held to maturity, available for sale, loans and receivables or financial assets at fair value through profit or loss ("FVTPL").

Financial assets classified as FVTPL are measured at fair value with unrealized gains and losses recognized through earnings. The Company's cash is classified as financial asset at FVTPL.

Financial assets classified as loans and receivables and held to maturity assets are measured at amortized cost. Financial assets classified as available for sale are measured at fair value with unrealized gains and losses recognized in other comprehensive income and loss except for losses in value that are considered other than temporary which are recognized in earnings. The Company does not have any assets classified as loans and receivables, held to maturity or available for sale financial assets at this time.

Transaction costs associated with FVTPL financial assets are expensed as incurred, while transaction costs associated with all other financial assets are included in the initial carrying amount of the asset.

Financial liabilities

All financial liabilities are initially recorded at fair value and designated upon inception as financial liabilities at EVTPL or other financial liabilities.

Financial liabilities classified as other financial liabilities are initially recognized at fair value less directly attributable transaction costs. After initial recognition, other financial liabilities are subsequently measured at amortized costs using the effective interest method. The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period. The Company's accounts payable and due to related parties are classified as other financial liabilities.

Financial liabilities classified as FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as FVTPL. Derivatives, including separated embedded derivatives are also classified as held for trading and recognized at fair value with changes in fair value recognized in earnings unless they are designated as effective hedging instruments. Fair value changes on financial liabilities classified as FVTPL are recognized in earnings. The Company is not exposed to any derivative instruments and foreign exchange hedges in place at this time.

2. Summary of Significant Accounting Policies (continued)

(m) Foreign exchange

These financial statements are presented in Canadian dollars, which is the Company's functional currency. The accounts recorded in foreign currencies have been translated into Canadian dollars on the following basis:

- (1) monetary assets and liabilities at the rate of exchange in effect at the financial statement date:
- (2) non-monetary assets and liabilities at the rates of exchange in effect on the respective dates of transactions; and
- (3) revenue and expenses at the exchange rates prevailing as of the date of the transaction.

(n) Accounting standard issued but not yet applied

Certain new standards, interpretations and amendments to existing standards have been issued by the IASB that are mandatory for future accounting periods. Some updates that are not applicable or are not consequential to the Company may have been excluded from the list below. The Company intends to adopt these standards when they become effective.

Standard effective for annual periods beginning on or after January 1, 2016

IAS 1 – *Presentation of Financial Statements* - In December 2014, the IASB issued an amendment to address perceived impediments to preparers exercising their judgment in presenting their financial reports. The changes clarify that materiality considerations apply to all parts of the financial statements and the aggregation and disaggregation of line items within the financial statements.

IAS 16 – Property, Plant and Equipment and IAS 38 – Intangible Assets - In May 2014, the IASB issued amendments to IAS 16 and IAS 38. The amendments clarify that the use of revenue-based methods to calculate the depreciation of an asset is not appropriate because revenue generated by an activity that includes the use of an asset generally reflects factors other than the consumption of the economic benefits embodied in the asset. The amendments also clarifies that revenue is generally presumed to be an inappropriate basis for measuring the consumption of the economic benefits embodied in an intangible asset. This presumption, however, can be rebutted in certain limited circumstances.

2. Summary of Significant Accounting Policies (continued)

(n) Accounting standard issued but not yet applied

Standard effective for annual periods beginning on or after January 1, 2018

IFRS 9 Financial Instruments - This is a finalized version of IFRS 9 which contains accounting requirements for financial instruments, replacing IAS 39. The standard contains requirements in the following areas:

- Classification and measurement. Financial assets are classified by reference to the business
 model within which they are held and their contractual cash flow characteristics. The 2014
 version of IFRS 9 introduces a 'fair value through other comprehensive income' category for
 certain debt instruments. Financial liabilities are classified in a similar manner to under IAS 39,
 however there are differences in the requirements applying to the measurement of an entity's
 own credit risk.
- Impairment. The 2014 version of IFRS 9 introduces an 'expected credit loss' model for the measurement of the impairment of financial assets, so it is no longer necessary for a credit event to have occurred before a credit loss is recognized.
- Hedge accounting. Introduces a new hedge accounting model that is designed to be more
 closely aligned with how entities undertake risk management activities when hedging financial
 and non-financial risk exposures.
- Derecognition. The requirements for the derecognition of financial assets and liabilities are carried forward from IAS 39.

The extent of the impact of adoption of these above standards on the financial statements of the Company has not yet been determined.

3. Reclamation Deposit

The Company has posted a deposit with the Department of Natrual Resources of the State of Utah ("DNR") as security towards future site restoration work. The deposit was posted in relation to the Keg Mountain Property in Utah (Note 5). In April 2015, the Company received a refund of US\$28,712 from the DNR and the remaining balance will be fully returned to the Company after site inspection is completed.

4. Equipment

	Cost	Accumulated Amortization			Net Book Value
June 30, 2016					
Computer and software	\$ 6,434	\$	5,426	\$	1,008
June 30, 2015					
Computer and software	\$ 6,434	\$	4,994	\$	1,440

5. Mineral Interests

Keg Mountain Property, Utah

By an Option Agreement with Inland Explorations Ltd. ("Inland") dated March 26, 2014, the Company acquired an option to purchase up to an undivided 65% interest in the Keg Mountain Property located 100 kilometers south of Salt Lake City, Utah, by agreeing to pay an aggregate of \$375,000 in cash, issue 6,500,000 common shares of the Company and expend US\$15,000,000. In connection with the acquisition of the Keg Mountain Property, the Company agreed to issue a total of 500,000 units to a finder.

The Company also issued 1,000,000 common shares to Inland and 200,000 units to a finder during the year ended June 30, 2014. The units issued to the finder consisted of one common share and one non-transferrable share purchase warrants, each warrant entitled the holder to purchase one additional common share at a price of \$0.10 per share for a period of 12 months..

The fair value of the 1,000,000 common shares issued to Inland was \$30,000. The fair value of the units issued to the finder was \$10,900, comprising the fair value of the common shares of \$6,000 and the fair value of the warrants of \$4,900, determined using the Black Scholes Option Pricing model with the following weighted average assumptions:

	2014
Share price on grant date (\$)	\$ 0.03
Risk-free interest rate (%)	1.58%
Expected dividend yield (%)	0%
Expected option life (Years)	5
Expected stock price volatility (%)	143%

On October 30, 2014, the Company decided to terminate the Option Agreement with Inland as the initial drilling results were not of sufficient interest to continue with the project. On June 30, 2015, the Company decided to abandon the Keg Mountain Property.

Since June 30, 2015, the Company has not incurred further obligations to Inland with respect to the Keg Mountain Property.

6. Related Party Balances and Transactions

Transactions with key management personnel and entities over which they have control or significant influence were as follows:

Personnel	Transaction	2016	2015
A private company controlled			
by Chief Financial Officer	Accounting fees	\$ 9,450	\$ 12,015
Chief Financial Officer	Stock-based compensation	-	1,860
Corporate Secretary	Bookkeeping and secretary	1,829	16,875
	Stock-based compensation	-	1,240
President, CEO, and Director	Stock-based compensation	-	3,100
Chariman and Director	Stock-based compensation	-	3,100
Former Director	Stock-based compensation	-	3,100
Director	Stock-based compensation	-	3,100
Total		\$ 11,279	\$ 44,390

Amounts due to related parties as of June 30, 2016 and June 30, 2015 were as follows:

Personnel	2016	2015
Corporate Secretary President, CEO and Director	\$ -	\$ 245 -
	\$ -	\$ 245

The amounts due to related parties are unsecured, have no specific terms of repayment and are non-interest bearing.

7. Share Capital

- (a) Authorized: unlimited common shares with no par value
- (b) Issued and outstanding:

During the year ended June 30, 2016

The Company did not issue any common shares during the year ended June 30, 2016.

During the year ended June 30, 2015:

The Company did not issue any common shares during the year ended June 30, 2015.

7. Share Capital (continued)

(c) Options

The Company has adopted a stock option plan whereby the Company can grant stock options to directors, officers, employees and consultants to acquire up to 10% of the issued and outstanding share capital of the Company from time to time.

During the year ended June 30, 2015, the Company granted 1,250,000 options to directors and officers of the Company with an exercise price of \$0.05 per share expiring October 10, 2019. The Company charged share-based payments of \$15,500 to operations. The Company used the Black-Scholes option pricing model with the following weighted average assumptions to value the options granted:

	2016	2015
Share price on grant date (\$)	n/a	\$0.05
Risk-free interest rate (%)	n/a	1.48%
Expected dividend yield (%)	n/a	0%
Expected forefeiture rate (%)	n/a	0%
Expected option life (Years)	n/a	5
Expected stock price volatility (%)	n/a	146%

There were no options granted in 2016.

The changes in options during the year ended June 30, 2016 and the year ended June 30, 2015 were as follows:

	Number of	Average
	Options	Exercise price
Balance, June 30, 2014	1,550,000	\$0.10
Granted	1,250,000	\$0.05
Forfeited	(600,000)	\$0.08
Balance, June 30, 2015	2,200,000	\$0.08
Expired	(325,000)	0.10
Balance, June 30, 2016	1,875,000	\$0.07

During the year ended June 30, 2015, 600,000 options were forfeited due to a resignation of a director.

Options outstanding and exercisable at June 30, 2016 were as follows:

Expiry Date	Number of Options	Exercise Price
June 12, 2017 October 10, 2019	875,000 1,000,000	\$0.10 \$0.05
	1,875,000	\$0.07

The weighted average life of the options outstanding and exercisable at June 30, 2016 is 2.19 years (June 30, 2015 - 2.77 years).

7. Share Capital (continued)

(d) Warrants

The changes in warrants during the year ended June 30, 2016 and year ended June 30, 2015 were as follows:

	Number of Warrants	Average Exercise Price
Balance, June 30, 2014 Granted	7,210,000 12,500,000	\$0.10 \$0.10
Finders' warrants granted Expired	200,000 (7,210,000)	\$0.10 \$0.10 \$0.10
Balance, June 30, 2015 Granted	12,700,000	\$0.10
Balance, June 30, 2016	12,700,000	\$0.10

Warrants outstanding at June 30, 2016 were as follows:

Evoiry Data	Number of Warrants	Exercise Price
Expiry Date May 13, 2019	12,700,000	\$0.10
	12,700,000	\$0.10

The weighted average life of the warrants outstanding and exercisable at June 30, 2016 is 2.87 years (June 30, 2015 - 3.87 years)

8. Management of Capital

The Company's objectives when managing capital are to identify, pursue and complete the exploration and development of mineral properties, to maintain financial strength, to protect its ability to meet its on-going liabilities, to continue as a going concern, to maintain creditworthiness and to maximize returns for shareholders over the long term. The Company does not have any externally imposed capital requirements to which it is subject. Capital of the Company comprises equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares.

The Company's investment policy is to invest its cash in financial instruments with financial institutions with terms to maturity selected to match expected timing of expenditures from continuing operations.

9. Financial Instruments

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgement, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

The Company's financial instruments consist of cash and cash equivalents, accounts payable and amount due to related parties.

The following table summarizes information regarding the carrying values of the Company's financial instruments:

	2016	2016		
Assets as FVTPL (i) Other financial liabilities (ii)	\$ 46,304 5,118	\$	135,169 456	

- (i) Cash and cash equivalents
- (ii) Accounts payable and amounts due to related parties

Fair Value

The estimated fair values of cash, accounts payable and amounts due to related parties approximate their respective carrying values due to their short periods to maturity. For fair value estimates, the Company classifies its fair value measurements within a fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

- Level 1 Unadjusted quoted prices at the measurement date for identical assets or liabilities in active markets.
- Level 2 Inputs other than quoted prices that are observable for the asset or liability either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3 Significant unobservable inputs which are supported by little or no market activity.

The following table sets forth the Company's financial assets measured at fair value by level on a recurring basis within the fair value hierarchy:

	Level 1	Level 2	Level 3	Total
June 30, 2016				
Cash	\$ 46,304	\$ -	\$ -	\$ 46,304
June 30, 2015				
Cash	\$ 135,169	\$ -	\$ -	\$ 135,169

PACIFIC IMPERIAL MINES INC. Notes to Financial Statements For the Years Ended June 30, 2016 and 2015

(Expressed in Canadian Dollars)

9. Financial Instruments (continued)

The Company's risk exposures and the related potential impact on the Company's financial instruments are summarized below:

Credit Risk

The Company is not exposed to significant credit risk. The Company limits exposure to credit risk by maintaining its cash and cash equivalents with financial institutions.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk through the management of its capital structure and financial leverage as outlined above.

The Company monitors its ability to meet its short-term administrative expenditures by raising additional funds through share issuances when required. All of the Company's financial liabilities have contractual maturities of 30 days or are due on demand and are subject to normal trade terms. The Company does not have investments in any asset backed commercial paper.

Foreign Exchange Risk

The Company is primarily exposed to currency fluctuations related to loans and receivables and accounts payable held in USD. As at June 30, 2016, the Company has assets of \$7,805 denominated in USD and is not exposed to significant foreign exchange risk. The Company does not actively manage this risk.

Interest Rate Risk

The Company is not exposed to significant interest rate risk.

10. Income Taxes

The following table reconciles the amount of income tax recoverable on application of the combined statutory Canadian federal and provincial income tax rates:

	2016	2015
Canadian combined statutory rates	26.00%	26.00%
Income taxes (recovery) at combined tax rates	\$ (25,000)	\$ (50,000)
Non-deductible and other items	4,000	(53,000)
Expiry of tax losses	77,000	21,000
Deferred tax assets (recognized) not recognized	(56,000)	82,000
Deferred income tax recovery	\$ -	\$ -

As June 30, 2016 and 2015, the amount of deductible temporary differences for which no deferred tax assets is recognized in the statements of financial position is as follows:

	20	16	2015		
	Temporary		Temporary		
	Difference	Tax Effect	Difference	Tax Effect	
Non-capital losses	\$ 2,182,000	\$ 567,000	\$ 2,420,000	\$ 629,000	
Capital losses	749,000	195,000	749,000	195,000	
Mineral properties and other assets	730,000	190,000	699,000	182,000	
Share issuance costs	9,000	2,000	17,000	4,000	
	\$ 3,670,000	\$ 954,000	\$ 3,885,000	\$ 1,010,000	
Unrecognized deferred tax assets	(3,670,000)	(954,000)	(3,885,000)	(1,010,000)	
Net deferred tax assets not recognized	\$ -	\$ -	\$ -	\$ -	

The Company has non-capital losses for income tax purposes of approximately \$2,182,000 (2015 - \$2,420,000) which may be carried forward and offset against future taxable income. These losses expire from 2026 to 2036.

11. Subsequent Events

- (a) The Company has acquired by staking a 100% interest in the Eagle Mountain Lithium prospect located in Inyo County, California, within 15 kilometers of the Nevada border. The property consists of 248 claims, each 20 acres in size, totaling approximately 4,960 acres located in the Alkali Flats area, which is 10 kilometers south-south-east of Death Valley Junction and covering most of the Eagle Mountain salina. In connection with the acquisiton, on April 30, 2016 and accepted by TSX Venture Exchange on October 14, 2016, the Company entered into a consulting and finder's fee agreement with a private corporation Gold Exploration Management Inc. (the "Consultant") to provide mineral exploration project management services. Pursuant to the agreement, the Company agreed to pay a consulting fee at US\$600 per day and management fee equal to 10% of the cost of all work programs conducted on the Eagle Mountain properties to be identified by the Consultant (the "Properties"), the management fee will be reduced to 5% for work program costs exceeding US\$100,000. In addition, the Company will issue common shares as a finder's fee to the Consultant for Properties identified and staked by the Consultant. The finder's fee will be between 2,000,000 and 4,000,000 common shares of the Company to be issued in 4 tranches over a period of 3 years, the final number of shares to be issued will be dependent on the price per share of a proposed equity financing to be conducted by the Company (see Note 11 (b)). Furthermore, the Company will grant the Consultant a 1% net smelter returns royalty on the Properties.
- (b) The Company has closed a non-brokered private placement to issue 10,947,000 common shares of the Company at \$0.025 per share for gross proceeds of \$273,675. The Company paid a finder's fee of \$2,543 and 180,000 common shares of the Company.
