NEWS RELEASE

PACIFIC IMPERIAL MINES INC. COMPLETES DRILL PROGRAM AT THE KEG MOUNTAIN PROPERTY

Vancouver, BC – August 6, 2014 Pacific Imperial Mines Inc., (the “Company”) (TSX-Venture:PPM) announces that the drilling program at the Keg Mountain Property in Utah optioned from Inland Explorations Ltd. has been completed.

Two diamond drill holes totaling 872 meters (2,861 feet) were drilled; Hole 14KMC-1 was completed at a depth of 459 meters and Hole 14KMC-2 was completed at a depth of 413 meters. The drilling was carried out to test Induced Polarization (IP) anomalies.

Both holes intersected a thick sequence of limestones and interbedded shale. Sections within the limestone and shale units were mineralized with finely disseminated pyrite and graphite which is interpreted to be the cause of the IP anomalies.

A total of 155 core samples from Hole 14KMC-1 and 98 core samples from Hole 14KMC-2 were analyzed for both precious and base metals. No values of economic interest were returned.
